

PORCELANOSA FACADE/

The Clare

The Clare

Manhattan, NY

Unique to this project, Porcelanosa was able to develop custom porcelain panels that emulated the same look as the natural limestone that was used throughout the base of the building. Additionally, the facade involved all mitered porcelain corners, giving it a clean and upscale look.

After completing the project, the architect Manuel Glas stated, “the open joint ventilated system, ease of installation, and durability of porcelain... inspired new ways to treat the facade.”
